

# The Newest Generation of Sydenstricker Genetics Sells on **November 22, 2014!**

36th Annual Production Sale, • 10 a.m. at the farm • Mexico, Missouri

Here are some of the fall yearling bulls headed for this year's event. They have been developed on Purina Impact Grower and grass, and will have yearling information gathered in early September. This year, we expect to sell 150 head of fall yearling bulls. All bulls will be ultrasounded and several will have genomically enhanced EPDs. They will be semen tested and ready to work, with exceptional performance and a diversity of bloodlines.

We will also sell about 60 January bull calves, with a wintering program available. The 350-head female offering will include spring bred cows and heifers, fall pairs, fall yearling heifers, and spring heifer calves. Complete performance information will be available.

One of the stand-out fall yearling bulls is this naturally slick-haired son of SydGen Rocky Road 2060. He offers a little different pedigree with exceptional phenotype and performance, and is sure to be one of the popular herd sire candidates in November. Pictured in late July in the field with his 72 contemporaries, Rock Star has been a popular choice of many visitors this summer.

EPDs as of 7/31/2014
