

Looking Forward to November 21!

Every year is a "virtual dispersion" of our six- and seven-year-old females and these proven dams always include many of our top donors and brood cows.

The dam of the \$15,000 SydGen Multi Tool 2432 that sold to ABS Global in our 2013 offering, 9089 stems from a cow family with proven longevity. Her grandam lived to be almost 20 years of age, weaning 16 calves at an average WR of 105, and was bred by Larry Leonhardt, Shoshone Angus, Cowley, WY.

This top daughter of SydGen CC&7 sells with a January heifer calf at side by SydGen Legacy 2813, a flush brother to the highest selling bull ever from the SydGen program, the \$113,000 SydGen FATE 2800. She has been flushed one time, producing 7 transferable embryos.

Her progeny record currently reads 3 BR-97, 3 WR-105, 3 YR-103, 3 IMF-106 and 3 REA-109.

Daughter of the Australian sire Kenny's Creek Sandy and posts a combination of \$W and \$B that only 64 other proven dams can meet or exceed. Has sons in service in Wyoming and New York and sells with a heifer calf at side by Dealer and re-bred the same way.

The sale offering will include about 35 of these spring calving cows, along with 60 fall-calving pairs. We will also offer about 140 fall yearling bulls, 60 January born herd bull prospects, 35 spring heifer calves, nearly 100 fall yearling heifers, and 50 bred heifers due in the spring. We plan to offer from 200-300 head of spring bred commercial heifers in our 18th Annual SydGen Influence Commercial Heifer Sale, later that night.
