

Create Your Tomorrow...

This high-volume Pathfinder donor has an exemplary production record on her first three natural calves, recording birth ratios of 97, weaning ratios of 107, yearling ratios of 107, IMF ratios of 115, and REA ratios of 103. Her two natural sons recorded 365-day weights of 1321 and 1353 lbs., selling to Vin-Mar Angus, Gordon, NE, and John J. Dillon, Boonville, MO. Her only daughter to sell was a featured Connection daughter in our 2004 sale to Paul's Livestock, Edwall, WA, at \$12,000.

260 has the look, the fertility and the performance to become a landmark donor. She has produced 6 flushes with an average of more than 12 transferable embryos per flush, and will sell open and ready to flush.

Sons and daughters by SAF Neutron, SAF Focus 9095, and SAF 598 Bando 5175 will also sell, and she has an outstanding group of calves born in the Sterita Park herd in Australia. Her dam has dominated the Missouri State Futurity through her descendants for many years, including this year's \$15,000 top-selling female for Birk Beef Cattle, Jackson, MO.

28th Annual Production Sale — November 18, 2006

This year's offering will once again include all of our salable seven-year-old cows as well as several top younger cows. Every cow pictured here and about 40 more will sell on November 18, 2006. Rounding out the offering will be 125 Fall Yearling Bulls, more than 100 January born herd sire prospects, 60 Fall Yearling Heifers, 50 Bred Heifers and 80 heifer calves. Close to 400 head of customer-owned bred heifers are expected for the SydGen Influence Sale.
