

# Create Your Tomorrow... ... Connect the dots on November 18, 2006!

This flush sister to SAF Connection has been a prolific donor, averaging 21 transferable embryos on three flushes. 0105 and a three-year-old daughter were selected as foundation donors for the Sterita Park stud in Australia. Two daughters were top-selling bred heifers in our 2004 and 2005 sales, each bringing \$10,000. This proven daughter of SAF Royal Queen 5084 sells in her entirety, bred to SydGen Focus 2049. Embryos sired by Boyd On Target will also be featured. Her natural calf at side, SydGen Corona 6078 will be one of the featured bull calves of this year's sale, offering outstanding performance and phenotype, a herd bull pedigree, and a +49.06 \$B Value.

Connection is the only sire on the main summary ranking in the top 3% for CED, top 10% SC, the top 1% \$W, and the lowest 10% Mature Weight. His soundness, semen quality, slick hair, and disposition have made him a favorite of everyone who has used him.

### SAF CONNECTION

Congratulations Katrina!  
Katrina Frey's great Connection daughter, KJF Pride K32-M35, culminated her show career as the Grand Champion Cow with Natural Calf at the Atlantic National as a three-year-old. M35's first natural calf was Reserve Grand Champion Female as well, and went on to be named Reserve Grand Champion Bred and Owned Female at the 2006 NJAS in Indianapolis.

### 28th Annual Production Sale

We'll sell more than 250 head of registered females, about 110 January bull calves, and 120 fall yearling bulls in this year's offering, along with about 400 head of commercial bred heifers from customer herds. Join us on November 18, 2006, as we unveil the newest generations of Sydenstricker Genetics, all designed to help you "create your tomorrow."

Connection/Corona and all 7 cows in his three generation pedigree have either served as SydGen donors or a daughter has served as a SydGen donor. "Off the pedigree" are three more cows that have served as donors here. Dam, the two-year-old pictured at the left, is our only Corona daughter in production, making him bred very similarly to SydGen Corona 6078. He displays the look, the muscle, the disposition and the performance we strive for, and will be one of the many top herd sire prospects offered on November 18, 2006.
