

Young Sires Soaring to New Heights . . .

The two top-performing bulls from the January 2006 SydGen calf crop, these powerful young sires have soared to the top of the sire summaries with their first progeny proof. They are the only sires to rank in the top 1% for both the \$W and \$B indexes on the young sire summary, and the only two bulls in the breed to combine that ranking with a scrotal EPD above breed average.
