

We're bringing our best!

Missouri Angus Futurity Columbia, MO February 25-26, 2017

From our first set of two-year-old daughters of the \$113,000 SydGen FATE 2800, this productive young female is a flush sister to the \$30,000 SydGen Shape, co-top-selling bull in our 2015 sale offering. Her genomic enhanced EPDs include her own performance stats, ratioing 107 for WW, 106 for YW, 103 for IMF and 121 for REA. Her donor dam, by SydGen CC&7, is a maternal sister to SydGen Turbo 6684, long-time breed leader for growth and HP EPDs. She is a proven embryo producer with six eggs from a conventional flush and 6 eggs from one IVF procedure.

Her beautiful September calf at-side is from the very first calf crop by the \$116,000 EXAR Stud 4658B, one of the breed's most popular young sires. Only 4 other non-parent females can meet or exceed her combination of CED, YW, SC, DOC, \$W and \$B. As always, we select our very best fall heifer calf pair for this event. This pair offers stalwart genomic-enhanced EPD profiles, exceptional pedigree, performance and phenotype and long-term upside potential. They will sell separately.
