We're Bringing Our Best!

We always try to select our best fall two-year-old heifer pair for this event, and this year's selection is an intriguing daughter of Connealy Cool 39L, out of our only full sister to the breed legend, SydGen CC&7. More and more breeders are recognizing the power of CC&7 in Angus pedigrees, and this female also offers a fairly unique pedigree that offers virtually unlimited mating opportunities. 5427 ranks in the top 1% for SC EPD, the top 3% for WW and YW EPDs, the top 4% for HP EPD and the top 5% for \$B. Her dam posts three natural progeny with average BWR-102, WWR-109, YWR-105, IMF-96 and REA-101 and should attain Pathfinder® status on the next Pathfinder® Report. 5427 will sell re-bred to EXAR Stud 4658B. Selling separately will be her August 31 natural heifer calf by SydGen Enhance that currently posts YW EPD of I+132 and \$B Value of +\$183.52. Her registration number is 18983522.

A special feature of this year's event will be an embryo package of 5 frozen IVF embryos from the \$60,000-valuation EXAR Henrietta Pride 9343, an own daughter of Sitz Henrietta Pride 643T sired by PA Power Tool 9108. 9343 was the top-selling cow at \$30,000 for one-half interest in our November production sale to Greiner Angus, Kalona, IA. 9343's first six calves to sell, also in our 2017 production sale, grossed \$50,000 including the third top-selling bull calf, SydGen Black Ice 7029. This cow family has produced many of the breed's top-selling females and bulls in recent years and 9343's mating to the widely-used SydGen Enhance offers a breed-leading package of both EPD and phenotypic excellence.
