

74th Anniversary Production Sale
November 21, 2026
10 a.m. - Mexico, MO

WELCOME TO SYDENSTRICKER'S 74TH ANNUAL PRODUCTION SALE

Congratulations Blake and Camille on your marriage January 17.

CHASE MONTE, MARGO MONTE, KIM SYDENSTRICKER-MONTE, EDDIE SYDENSTRICKER, CONNIE SYDENSTRICKER, CAMILLE AND BLAKE BRISCOE, LEE ANN SYDENSTRICKER, BRITTON BLOCK, PAIGE BRISCOE AND SYDNEY BRISCOE.

Dear Cattlemen,

Welcome to our 48th Annual Production Sale as we celebrate 74 years in the Angus business. We thank all the customers, supporters, competitors and employees who have been important to us along the way! We are proud of the Angus history that has been made here, as well as our sales history that includes some of the breed's most valuable animals, yet also includes cattle that "anyone can afford," to quote Ralph Sydenstricker.

The demand for CAB® and Prime beef continues to be a bright spot in the beef industry. No other country in the world can compete with us in the production of high quality beef. That is our strength in the world marketplace. Investing in quality breeding stock today helps you take full advantage of the better prices we're now seeing.

We believe the Angus cow is the most efficient in the business, and the breed will continue to dominate the genetics of the commercial cow herd. Our EPD system has allowed us to characterize Angus bulls very specifically, so when a commercial producer buys that bull to do a certain job, he will do that job. That reputation has been the driving force for the popularity of the Angus breed in the commercial sector today. The on-going weather stresses of the last several years reinforces the flexibility of the Angus cow.

We regard our position in the beef industry as research and development, finding and proving the sires that can force their way past the genetic antagonisms inherent in beef cattle production. We like to do that with as much diversity of bloodlines as possible. However, we continue to strongly pursue multi-trait excellence, not giving up the progress we've made solely to bring in new blood. These cattle need to excel on the measurable EPD traits to insure our customers' profitability, and they must be sound, fertile and efficient. The use of multiple bloodlines just gives us and our customers more options to select from, and more genetic diversity for the breed.

As always, we will do our best to inform you, our customer, with all the information we can to help you make good buying decisions. All breeding animals selling are either tested free of AM, NH, CA and D2, or have no pedigree risk, and that pedigree is substantiated by years of parentage verification. All animals at risk for M1 and DD are tested, and sell as is. As time has gone on, we have seen the accuracy of genomic evaluations increase, and every animal under five years of age that sells is genomic tested.

We hope you will be with us November 21st to give us your evaluation. Come early Saturday morning and enjoy our Missouri country breakfast before the sale. If you cannot be here, our sale will once again be broadcast live on the internet by DV Auction.

For more information on any of the cattle in this offering, or if we can assist you in making travel arrangements, please call the farm office at (573) 581-1225 or the dealership office at (573) 581-5900.

We look forward to seeing you!

Sincerely,

Eddie L. Sydenstricker Ben W. Eggers

Sydenstricker Genetics will probably retain half interest in a few of the females selling. Terms and conditions, and selections, will be announced closer to sale day.

Schedule of Events

Friday • November 20, 2026

8 a.m.

Cattle available for inspection

6 p.m.

Hospitality hour at the Empire Club

7 p.m.

Dinner at the Empire Club

Saturday • November 21, 2026

8 - 10 a.m.

Missouri Country Breakfast

S A F FOCUS OF E R

About the Cover: This year we feature the top-selling bred heifer from the 2025 event, and her spring daughter that is featured as Lot 2.

Price Range of the 458 Bulls in our 2023, 2024 & 2025 Sales

SydGen Herd Sires

Our herd sires, including some not referenced on this and the next 11 pages, are responsible for over 155,000 progeny in the AHIR database, of which over 63,000 have ultrasound scans, along with over 6,000 progeny on Australia's Breed Plan. More than 49,000 daughters of these sires have had calves reported on AHIR, and over 3,900 progeny have been reported through carcass evaluation. Genomic scores have been done on over 37,500 progeny. We own 46 sires used widely enough to earn a place on the 2026 Sire Evaluation Report.

Most of these sires are available to you via artificial insemination, and semen can be ordered through our farm office, from ORIgen Cattle Services, Huntley, MT, and from many local distributors, including ABS representatives, on many sires. We have semen prices printed at the end of each footnote on sires available directly from us, and all AI certificates are priced at \$40, unless otherwise noted. If you would like to pick up semen on sale day, please let us know in advance so we can have ample supplies.

Some of these bulls will be on display sale day. Others are at their respective co-owners' farms, depending on ownership of the possession interest. All of the SydGen AI sires do see natural service duties; we think it's important for proper development of the bull.

Our Mission

"To insure the success of our customers by developing predictable Angus genetics that excel in all the economically important traits, including carcass quality and cutability, feedlot performance, roughage conversion, maternal traits, fertility, disposition and soundness – thus allowing them to consistently and profitably produce a high percentage of finished cattle that meet Certified Angus aTM specifications."

Ralph Sydenstricker began his farm machinery business in 1944 with an International Harvester dealership in Paris, MO. One of his salesmen, Grant Dickson, came in one day in the summer of 1952 and told Ralph he believed he could sell the Super C Farmall tractor on the lot, if Ralph would take two registered Angus cows with heifer calves on the trade, and allow the customer \$1,000 apiece for them. Ralph, Grant, and 12-year-old Eddie went to look at the cows and close the deal.

Eddie and his sister, Betty Jo, became very active showing in 4-H and FFA. Eddie was involved in forming the very first junior Angus association in the U.S., when, in 1956, the Missouri Junior Angus Association was organized at Monroe City, MO. Eddie served as the first President, assisted by Ronnie Rodgers, vice-president; Fred Blades, secretary; and Liz (Moore) Coon, treasurer. Lyle Haring, regional manager for the American Angus Association, and Ed Stout, Missouri Angus Association fieldman, were instrumental in this project. Later, Eddie was selected by Dean Hurlbut, the newly appointed Director of Activities at the American Angus Association, to participate in "An Angus In Your Future," a film produced by the Association to encourage youth to get involved with Angus cattle. Eddie continued his involvement in FFA, serving as State Secretary in 1957-58, and receiving the American Farmer degree in 1960.

Ralph teamed up with Jim and Ray Blades in 1959 for their first production sale. Col. Roy G. Johnston was the auctioneer, and the ringmen were Lyle Haring, Mark Dempsey, Wes Hays, Veryl Jones, Ed Stout, and Nick Iman. Ralph continued to have production sales through the sixties. The top bull in his 1964 sale was a son of TA Economist 7 that sold for \$1,000. Ralph was elected President of the Missouri Angus Association in 1966. In 1960, the family moved the cattle to Mexico, MO, as Ralph purchased the John Deere dealership in Mexico. Eddie and Connie were married in 1961, and lived in Macon from 1965 to 1969, managing the International dealership they acquired in 1965.

In the seventies, Ralph stepped up the pace a bit, and, looking for a little more growth, imported several heifers and bulls from Canada. Twenty females with a total price tag of \$21,980 were brought to Mexico, MO, in December 1974. He found Happyvale Olympic 012H at the side of his dam in June, 1976, and returned later to Canada to make him the top-selling bull in the Happyvale sale at \$20,000.

While Ralph was expanding the cow herd, Eddie and a talented mechanic named Van Botkins designed and campaigned the Cajun Queen pulling tractor, winning every National Championship there was. Eventually, John Deere Engineering at Waterloo, IA, took the engine from this tractor to develop the 466 cubic inch engine that was used in all the 40 and 50 series tractors made by John Deere for nearly twenty years.

Ralph decided he needed some help with the quality herd he was putting together, and, in search of a herdsman, scheduled Wayne Kestler to come to Mexico for an interview on January 6, 1977. Wayne Kestler did come to Mexico that day, as did many other Angus friends, but it was not to discuss the position of herdsman, it was to attend the funeral of Ralph Sydenstricker.

Eddie, busy with the dealership for many years, now had a decision to make, regarding the farm and the cattle. Obviously, he chose to continue the Angus operation, known as Sydenstricker Angus Farms, and to hire Wayne Kestler as herdsman.

Eddie wasted no time. In March 1977, he acquired Eisa BAS 89 for \$2,000. She produced the \$33,000 SAF Windwalker and the \$12,000 SAF Windjammer during her tenure here. On June 21, 1977, Eddie acquired an interest in Happyvale Marshall Pride 013G, known as "Mighty Marshall." He was owned with Erdmann

Angus, Wetonka, SD, and Jim Baldridge, North Platte, NE, and sired the Grand Champion Carload of Bulls at the 1978 National Western, along with the top selling pen of heifers at the 1978 Denver Foundation Female Sale. Although Ralph had had several sales over the years, Eddie began the Annual Production Sale in November of 1978.

An early female who left a mark on the entire Angus breed was Schearbrook Wendy N023, purchased for \$5,100 in June 1978. A son was grand champion and top selling bull at the 1981 Missouri State Sale, and she produced many other show ring champions.

Through the seventies and early eighties, Eddie and Connie's daughters, Kim and Lee Ann, showed extensively in junior shows throughout the country, perhaps highlighted by Lee Ann's last show heifer becoming the farm's first Missouri State Fair Grand Champion Female in 1984, with a descendant of Wendy. Kim and Lee Ann were both active in the Missouri Junior Angus Association their father helped start, and both served as officers.

Eddie served as treasurer of the Missouri Angus Association for many years, and served three years on the American Angus Association Board of Directors. In 1995, Eddie received the Livestock Person of the Year Award from the University of Missouri Block and Bridle Club.

The first Annual Production Sale was held in November 1978. The sale was managed by National Livestock Brokers, and the auctioneers were Jim Baldridge, Nick Iman, and Al Conover. The ring help that day were Veryl Jones, Tim Lackey, Paul Gibbs, Mark Dempsey, and John Barton, as 141 lots averaged \$1,332. In 1978, Don Simpkins joined the crew until his retirement in 1991.

One of the most talked-about bulls of his era was Cracker Jack Baros 2459, better known as "Prime Rate." In the 1981 sale, the first Prime Rate calves were featured at the most successful sale held to that point. Col. Ray Sims and Col. Jim Baldridge cried the sale, with Veryl Jones, Dean Pike, Greg Garwood, Tim Lackey, Mark Dempsey, Lyle Eiten, John Barton, and "Doc" Smith working the ring. National Livestock Brokers managed the sale, and John Rudolph and John Ponticello served as consultants.

Bill and Li Bowman were hired in 1981, staying through 1989, and had a significant impact on the program during the eighties, exhibiting 34 State Fair champions in 1987 alone. Ben Eggers joined the team in 1982. Many other good employees have come and gone through the years, including Charley Boyd, Lewis Moten, Dale Randolph, John Ripberger, Don Simpkins, Randy Graham, Bonnie DeYoung, Todd and Tracy Ragsdale, Ed and Mandy Raithel, Dan Sharp, Allen Robinson, Randy Ray, Pat Talley, Ken Rhodes, John Schneider, Travis Sharon, Brent Schuering, Matt Gruber, Nelson Groves, Josh Lewis, Stacy Loyd, Pat McCarty, Nick Schafer, Dave Pickerell, Suzy Harrison-Moore, Aaron Ishmael, Anthony Carey, Chris Beedle, Matt Rouse, Tyler Allen, Eric Allen, Sammy Breid, Jennifer Russell, Brad Porter, Brittany White, Ryan Meyers, Cole Bass, Cash Prestien, Joe Strauss, Kyle Tate, Brad Slavens, Cooper Ervin and Roger Cranmer.

EDDIE SYDENSTRICKER WITH HIS 1956 MISSOURI STATE FAIR FFA SHOW GRAND CHAMPION, VIOLA K.

MISSOURI STATE FFA OFFICERS, 1957-58. EDDIE SYDENSTRICKER, SECRETARY, SEATED FOURTH FROM LEFT. IN 1960, EDDIE RECEIVED THE AMERICAN FARMER DEGREE.

The eighties were an exciting time at Sydenstricker's, as the foundations were laid for many of the cattle we still have. The purchase of three females from the mating of Brost Power Drive to Leachman Lass 1004, two of them as heifer calf pregnancies and one as a \$19,000 heifer calf, gave us the base to produce such herd sires as SAF Fame and 5175. Also from Jay and Les Leachman, an \$18,000 heifer named Leachman Royal Queen 2027 founded the Royal Queen family here, eventually producing SAF Royal Queen 5084. A Rito 2100 GDAR daughter, Pride Queen T 4155, purchased at the NILE, put her stamp on the Angus industry with a flush of calves born in 1986 that included SAF Power Shaft 6021, the \$33,000 SAF Pride Queen 6013, and the record-holding highest selling bull and heifer to ever sell at a Missouri State Sale, the \$12,500 SAF Power Fix and the \$40,000 SAF Pride Queen 6012. Then, in 1989, in Manhattan, MT, we outbid three competing syndicates to acquire two-thirds ownership in VDAR New Trend 315, the bull who defined multi-trait superiority in his day, and set the tone for the Sydenstricker program through today.

In 1990, we shocked the Angus community by scheduling the Dispersion minus Fifty sale, where we sold down to 50 registered females in what turned out to be our highest-grossing sale to that point, proving that truth in advertising can work, and that at least 67 bull calves can be sold in Missouri on one day. No sale was held in 1991, so we used the extra time available to scour the country for fresh genetics to bring in. The deal to "pick" six heifers from the entire Gartner-Denowh heifer calf crop, on an alternating basis, turned out to be one of the best things we've ever done, as females like GDAR Forever Lady 178 and GDAR Forever Lady 246 have proven their value many times over.

Throughout the nineties, we put more and more emphasis on the commercial side of the industry, stepping up our carcass evaluation of herd sires, exploring new programs that could benefit our commercial customers, supplying more and more useful performance data to our customers through our sale books, and creating the Sydenstricker Influence Sales. We published our first Herd Sire Directory in 1993, the same year a calf named SAF Fame topped our sale at \$27,000, and actively pursued the direct semen sale market. We had the first 100-head bull sale in Missouri in 1996, where we also sold the top selling bull calf in our history, SAF Focus of ER, at \$68,000. In 1997, we received the CAB Seedstock "Commitment to Excellence" Award, primarily for our focus on carcass traits equally with performance traits. SAF Fame became the second most heavily used bull of the breed in 2000.

In 1993, Ben Eggers was elected President of the Missouri Cattlemen's Association, and served on various committees as well as the Board of Directors of the National Cattlemen's Beef Association. In 1998, he was elected to the Board of Directors of the American Angus Association, serving as President in 2006. At the Annual meeting in Louisville, Ralph was inducted posthumously into the Angus Heritage Foundation in 2004, and Eddie was inducted in 2006. Ben and Darla were inducted in 2023.

When we entered the new millennium, we took a big step. Wanting a distinctive prefix, and to send the message that we are selling genetics, not just cattle, we changed our name to

Sydenstricker Genetics. In 2001, the first bull to sell with our new SydGen prefix, SydGen Refocus, broke his full brother's record to become our top selling bull ever, at \$100,000 for one-half interest.

At the 2001 Beef Improvement Federation meeting, we were awarded the Seedstock Producer of the Year Award, the most prestigious award in the seedstock industry, signifying the national impact of the Sydenstricker program. We also joined with several other seedstock partners to found ORlgen, Inc. Ben served on the Beef Improvement Federation Board of Directors for eight years, and was elected President in 2011. In 2013, he received the Continuing Service Award from BIF, and in 2018 was named the Missouri Cattlemen's Association "Cattleman of the Year." Ben was given the 2022 Missouri Angus Pioneer Award.

We have been a tour stop on the National Angus Tour and the BIF Tour, as well as hosting part of the LEAD Conference in 2011. Eddie and Connie were inducted into the Honorary Angus Foundation in 2013 for their work in support of Angus youth. Eddie received the Missouri Angus Breeders' Pioneer Award in 2014, the Allied Industry Award from Missouri Cattlemen's Association in 2015, the Livestock Person of the Year Award from the University of Missouri Block and Bridle Club in 2017, and the Honorary State Farmer Degree by the Missouri FFA Association in 2022.

Sydenstricker Nobbe Partners of Missouri and Illinois has received the top performance award in Leaders Club, John Deere's highest award, for many years. In 2021, they were named "North American Farm Equipment Dealer of the Year" by Farm Equipment magazine. Expansion has increased the last few years, with 42 locations in four states now included.

The SNP Career Academy has developed into a successful venture, and is the only one of its kind, designed to keep qualified technicians available to SNP stores.

Daughters Kim and Lee Ann are both involved in the dealerships, with Kim doing PR from the Mexico location, and Lee Ann doing Marketing from St. Louis. Grandson Chase Monte, Kim's son, exhibited at nine Missouri State Fairs and seven National Junior Angus Shows. Chase was President of the Mexico FFA Chapter in 2016, graduated from the University of Missouri in 2021, and is now Equipment Operations Manager for Emery Sapp & Sons. He and Margo recently celebrated their first wedding anniversary. Blake Briscoe graduated from Vanderbilt University with a B.S in Finance and is now a Vice President at Wellspring Capital Management, New York, NY. He and Camille Smith were married in January of 2026. Granddaughters Sydney and Paige Briscoe graduated in 2019 from Ole Miss. Paige is now the Brand Manager at Citadel Partners, Dallas, TX, and is engaged to be married in October. Sydney is a Marketing Assistant/ licensed realtor at Janet McAfee Real Estate, St. Louis, MO.

From the early Sire Evaluation reports printed twice a year, to today when a new National Cattle Evaluation is on-line every Friday, along with genomic-enhanced EPDs, bio-economic indexes, and the ability to DNA test for parentage and genetic recessives, we have seen technology change the face of the seedstock industry. We continue to keep this herd at the forefront of the Angus breed, and supply our customers the genetics and the customer service they need to compete.

Our most heavily used AI sire in history has been SydGen Enhance, primarily because of multi-trait superiority. VDAR New Trend 315, born 38 years ago, was labeled with that phrase during his strongest days as an AI sire, and was our first bull to gross over \$1M in total semen and certificate revenue. Enhance traces to 315 nine times in his extended pedigree. As this goes to press, Enhance has over 19,000 progeny in the Angus database.

EDDIE AND VAN BOTKINS WITH THE ORIGINAL "CAJUN QUEEN," PERHAPS THE MOST FAMOUS PULLING TRACTOR IN HER DAY.

- Owned with Hoover Angus Farm, Tingley, IA
- CC&7, named for his two closest sires and the 7 SydGen donors in his pedigree, was the top-selling bull in our 2006 Sale at \$39,000 for half-interest. With over 9,200 progeny now on record, his prowess for adding DOC, REA, HP and Milk is legendary. His descendants consistently show up as some of the most powerful genetic improvers in the breed.
- Semen \$75

SYDGEN GAMMA 3482

- High performance son of Gavel being used in natural service. Exceptional for CED, growth, HP, SC, CEM, Milk, FL, Marb, REA, \$F, \$W, \$G, \$B and \$C. Dam has 4 WR-114.

- The top performing calf in our 2023 February bull calf crop; he is exceptional for growth, RADG, HP, CW, \$F and \$W.

- Bred by Connealy Angus, Whitman, NE, from their first set of progeny by KCF Bennett Culmination. His EPD profile is strong across the board. Some of his first progeny sell today.
- Semen \$30.

- Owned with ABS Global, De Forest, WI
- Top-selling bull at \$45,000 for half interest, in the 2024 production sale. He brings a strong profile for multi-trait superiority, with exceptional rankings for Milk, CW, REA, \$F, \$W, \$B and \$C.
- Semen \$30.

- Owned with Brinkley Angus Ranch, Milan, MO
- Acquired in the March, 2025 Brinkley Production Sale where he was top-selling bull and 9 maternal siblings averaged over \$18,000. In that offering, he was the Number 2 bull for Sale Day Weight and #1 for \$Maternal.

- One of the highest performing fall yearlings in the 2024 offering, but did not sell as he had not passed semen test. He passed later, and has done a very good job in natural service for three seasons.

- One of the most elite genetic packages ever offered in a SydGen Production Sale, this female writes an immaculate profile of balanced trait EPDs and index values for the economically relevant beef industry traits.
- The member of an impressive flush that also includes flush brothers featured as Lots 76A - C, as well as a maternal brother selling in the spring bulls as Lot 17.
- Her now-deceased dam was the \$60,000 valued female that sold in our 2022 sale with Greiner Angus, Kalona, IA purchasing one-half interest, and she has compiled a solid production record with 2 natural calves average weaning ratio at 111, and yearling ratios of 109.
- Maternal sisters sold in the 2024 SydGen sale for \$25,000 to Pollard Farms, Waukomis, OK, and to Brinkley Angus Ranch, Milan, MO & Lazy H Ranch, Hays, KS at \$11,000.
- An embryo package out of a maternal sister sold in the 2026 MO Angus Futurity Sale to The 808 Ranch, Anderson, MO.
- Dam has been a herd bull producing factory, being the dam of the \$35,000 Southland owned with Amonett Farms, Byrdstown, TN and Mershon Cattle LLC, Buckner, MO; the \$32,000 Skillset we own with Brinkley Angus Ranch, Milan, MO; and the \$22,000 Leader owned with Mogck & Sons, Olivet, SD.
- A maternal brother sold for \$22,000 to Bernard & Carla Taylor, Houston, MO; another to Merhon Cattle LLC, Buckner, MO for \$13,000; to D&R Angus, Buffalo, MO for \$12,000 and \$6,750, and to Jerry Maas, Quincy, IL for \$13,000.

- The dam of this True Balance heifer was the featured bred heifer in the 2025 SydGen Production Sale selected by Greiner Angus, Kalona, IA with one-half interest selling for \$62,500.
- This natural calf had a weaning ratio of 114, possesses the number one MARB EPD among the heifer calf offering, and is pictured on the front cover with her dam, early last summer.
- The maternal grandam came to SydGen as a bred heifer in the 2022 Spruce Mountain Ranch Production Sale, and she has 3 weaned progeny with an average ratio of 109 at SydGen, Grandam sells as Lot 317 and maternal brother sells as Lot 43.
- A maternal brother to the dam sold in the 2023 SydGen sale to Bradley Deeken, Linn, MO.
- A great opportunity to get in on the ground floor with the first daughter of the next generation donor at SydGen.

- A high growth female, she possesses top-tier percentile rankings for CW EPDS, SC and SB index values.
- This heifer had the misfortune of losing her dam prior to weaning, so she is in a single head contemporary group and her individual performance data does not impact her EPD and index predictions.
- A maternal brother to the dam sold in the 2026 SydGen Influence Sale for \$9,000 to Welp Grain & Livestock, Schnellville, IN, with their other maternal brother selling in our 2022 production sale to Snelson Farms Trust, Rolla, MO for \$10,000.
- SydGen Rita GA 8966 has a stellar production record with 4 calves average weaning ratio of 110, yearlings at 109, and Ribeye at 112, selling in the 2025 SydGen Production Sale to Jason Shamblin, Looneyville, WV.
- Great-grandam, SydGen Rita 5730, was the \$100,000 valuation SydGen Rita 5730 that served as a long-time donor with Express Ranches, Yukon, OK.

- This heifer calf writes a tremendous genetic profile balancing the economically relevant traits for the beef industry.
- The top \$C value in the heifer calf offering, striking a great balance with top-tier ranks for both \$M and \$B.
- The dam sold as Lot 1 in the 2022 SydGen Production Sale with one-half interest going to John David Todd, Norman, OK for \$15,000, and was retained here in a joint ET program.
- Dam has 3 WWR-103, and has been a prolific donor in the ET program.
- Flush brothers to this Pollard Hennessey daughter sell in the spring bull division as Lot 25.
- Maternal sibs include the fall heifer selling as Lot 10, and a set of ET brothers selling as lot 81.
- A maternal sister was the featured Lot 4 in the 2024 production sale to Belle Point Ranch, Lavaca, AR for \$17,000.
- Schallberger Land & Cattle, Cape Girardeau, MO purchased a maternal brother in 2025 for \$11,000.
- Turner Farms, Belgrade, MO purchased the maternal grandam at \$7,000 in 2024, and while at SydGen she raised 4 calves with an average weaning ratio of 112.

- This Empire son was the natural calf produced by the foundation Ruby Rose donor that came to SydGen as the \$25,000 purchase produced in the Blue Mound Angus herd at El Dorado Springs, MO.
- A full sister is a featured open heifer calf selling as Lot 4.
- Maternal sisters sold in the 2025 SydGen Production Sale to Greiner Angus, Kalona, IA at \$25,000, to The 808 Ranch, Anderson, MO for \$16,000, to Deer Valley Angus, Fayetteville, TN for \$10,000, to Mark Moriondo, Mount Vernon, MO, and to Terry Strauch, Hamburg, IL.
- Steele Farm Inc, Richmond, MO bought a maternal brother in the 2025 sale for \$10,000, with another selling for \$8,500 to Chris Kent, Green City, MO; and in the 2026 SydGen Influence Sale Brush Creek Acres, New Cambria, MO purchased another maternal brother at \$9,750.
- A maternal sister is a donor in the SydGen program with progeny selling as Lots 3, 85, and 187.
- At the time of this writing, 18 maternal sibs have an average IMF ratio of 122 solidifying the upper percentile ranks on \$B, \$C and MARB for this prospect.

- A high performance, thick made son of Jameson with extra growth and an upper percentile rank for MARB EPD.
- Dam came to SydGen as a bred heifer in the 2024 Hopson Angus Production Sale, Crescent, OK, a member of the highly valued Rita cow family.

Bull Calf Wintering Program

We have sold many of our bulls as calves in past years, and are doing so again this year. Though they are not old enough to semen test by sale day, they are Guaranteed Breeders. Many cattlemen prefer buying calves and raising them at home to get them acclimated and to have the bull developed and ready to go out at breeding season. For those of you who do not have the facilities to raise the bulls, or just prefer not to do it, we offer an option for people buying bulls in this sale. For a flat fee of \$300.00, you may leave the bull here and we will raise him in our normal manner, and you may pick him up any time during the month of April, 2027. The bulls wintered at Sydenstricker Genetics will have yearling weights taken, be ultrasounded for body composition, and have a breeding soundness evaluation. Buyer does own the bull as of sale day, and assumes all risk of injury or death. We would suggest buyers purchase insurance on these bull calves. Bulls will be raised on a ration of grass hay, corn silage, oats and corn. They will be well grown out and hard, not over-conditioned.

- High percentile ranks for \$W and \$C index values, driven by growth and efficiency with RADG and CW EPDs in the upper ranks.
- Mershon Cattle LLC, Buckner, MO purchased a maternal brother in 2025 for \$5,250.
- The maternal grandam came to SydGen as an embryo from Hinkley's Prime Cut Angus, Nevada, MO through the MO Angus Breeders Futurity, and as a donor she produced 28 progeny with an average ultrasound IMF ratio of 117.
- A maternal sister to the dam was the \$150,000 record setting female selling in the 2019 SydGen Production Sale going to Spruce Mountain Ranch, Larkspur, CO and Crazy K Ranch, Michie, TN. She sells today as Lot 246.

Interest Retained in Bulls

We are selling half revenue-sharing interest with full possession on all bulls, unless otherwise noted. This means the bull is totally in your control as far as how you want to handle him, and you get 100% of the salvage value of the bull. Simply, we have the right to half the semen sales revenue from the bull if sometime in the future, semen sales become a possibility. If you sell the bull to another breeder, Sydenstricker Genetics retains that half semen interest.

The buyer has the option, on sale day, to pay one-third more than the bid price in order to obtain two-thirds revenue-sharing interest and full possession.

If you purchase a half interest bull and wish to collect some semen on the bull as an "insurance policy" for your own use, that semen is 100% yours, unless Sydenstricker Genetics is in contact with you and also wishes to collect the bull, either for within herd use, or to build a jointly-owned bank of semen for sale purposes. If you are not interested in collecting semen on the bull, SydGen does have the right to collect the bull for their own use, will pay the expenses involved, and will do so at the convenience of the owner of the possession interest.

General Information On The Fall Yearling Bulls

We are certain most buyers of these fall yearlings (Lots 74-186) will want to take them home after the sale. They are semen-checked, vaccinated, and ready to go. If you would like to leave him here on our wintering program until April, the cost will be \$400.00. This will include a re-check on his semen test.

There are five weaning contemporary groups in this set of bulls. Lots 74-111 were natural and ET calves out of two year olds, and natural and ET calves from our HH location. Those were fed in one feeding group at Dodson, and gained 3.20 lbs./day. Adj. YW average was 1,248 lbs. The bulls lotted as 112-186 were raised at our Garcia and Dodson locations, as well as ET calves with a commercial cooperator, fed at WFL, and gained 3.39 lbs./day. Average frame score on all fall bulls was 5.6 and average adj. SC was 34.4 cm. Average adj. IMF was 4.60%, REA of 15.7, rib fat of .35 and rump fat of .37.

Calves were brought in from all locations and weaned, with weaning weights taken on May 21 & 22, about 7 days after actual weaning. Bulls were put on a complete, self-fed ration in two 10-acre fescue pastures until yearling weights, scrotal measurements, and ultrasound scans were taken on September 14 and 17, for total days on feed of 115 or 119 days respectively. There was no "warm-up" (or shrink out) period between the date weaning weights were taken and their beginning test weight. The feed we now use on the bulls, Purina Bull Developer, does have limiters in it, and we have been pleased with the condition and the soundness of the bulls coming off test. We included substantially more fiber in the ration for five years now. Bulls were all vaccinated with Bovi-Shield Gold FP 5 L 5 HB and Ultrabac One Shot, and poured with Dectomax, and gradually converted to a silage and hay based ration, which they stay on until sale day. We wean late, and have a short feeding period in order to better utilize spring grass, and to help keep the bulls from being over-conditioned.

Cowboy Logic #90

Many of us have a predisposed notion that we want calving ease/low BW herd sires. But, in the Angus breed, do we really have that much problem with big calves? It seems like most of the problems at birth are more linked to abnormal presentations than actual calves that are too big for the cow or even heifer. And, it seemed like maybe those smaller calves just were not as thrifty. We decided to see if we could dig into the data, and see what survivability to weaning really looked like. After all, a small calf at birth doesn't really help the bottom line if he dies prior to weaning anyway!

We divided up four years of spring calf crops into three groups: (light) 69 lbs. or less; (medium) 70-89 lbs.; and (heavy) 90 lbs. and up. We edited out any abortions and all twins. In a nutshell, the death loss at birth through weaning was twice as high on the light calves as it was on the medium calves. The death loss on the heavy calves was the least of the three groups, and it was the least in every one of the four years. We did not differentiate according to cause of death, or whether it was right at birth or later on pre-weaning.

We've all heard someone say the growth rate of a dead calf is distressingly poor, and took that to mean we needed lighter calves at birth so we would get more of them born alive. Every operation is different, but it certainly appears to us that bigger calves at birth are more likely to still be around at weaning. We would never advocate breeding heifers to anything but a true heifer bull, but our cowherds might be much better served by sires that give their calves more of a head start.

A study by the University of Illinois on Sim-Angus cattle reported the same conclusions.

- This son of Smokey kicks off the fall bull division in the catalog, and he sets high standards for carcass value with an impressive \$B and \$C index value. Scanned 8.95% IMF with 18.8 REA.
- The dam was a feature of the 2022 sale as a fall heifer with half interest selling to Express Ranches, Yukon, OK for \$50,000, after posting ultrasound ratios of 218 for IMF and 106 for REA.
- Dam has produced 2 natural calves with an average weaning ratio of 108, and her first 5 ultrasound progeny post an average IMF ratio of 133 and REA ratio of 106.
- Bernard & Carla Taylor, Houston, MO purchased a maternal sister as Lot 2 in the 2024 SydGen Production Sale for \$11,000.
- A maternal brother sold in our 2025 sale for \$5,000 to Lane Conderman, Foley, MO.
- A maternal brother to the dam sold in the 2023 SydGen sale to Ronald White, Ashland, MO, and their maternal sisters have sold to Gregory Connell, Eugene, MO and to Randy Hunninghake, Frankfort, KS in past sales.

- A powerful flush sired by True Balance will make a lot of friends on sale day, their dam sold in the 2022 SydGen Production Sale where one-half interest was purchased by Greiner Angus, Kalona, IA for \$30,000.
- A flush sister is the Lot 1 featured female in this sale.
- Dam has produced 2 natural calves with weaning ratios at 111 and yearling ratios of 109.
- SydGen herd sires produced by the dam include the \$35,000 Southland owned with Amonett Farms and Mershon Cattle LLC, the \$32,000 Skillset we purchased from Brinkley Angus Ranch, and the \$22,000 Leader selected by Mogck & Sons.
- Maternal brothers also sold in the 2024 production sale to Bernard & Carla Taylor, Houston, MO for \$22,000, to D&R Angus, Buffalo, MO at \$12,000 and \$6,750, and to Jerry Maas, Quincy, IL for \$13,000 and \$4,500.
- Mershon Cattle LLC, Buckner, MO purchased a maternal brother sired by Verified in the 2025 SydGen sale for \$13,000.
- Maternal sisters sold in the 2024 sale to Pollard Farms, Waukomis, OK for \$25,000, and to Brinkley Angus Ranch, Milan, MO & Lazy H Ranch, Hays, KS for \$11,000.

- A top percentile rank for \$C, this bull carries strong genetic predictions for growth and quality pounds with elite MARB EPD combined with strong \$W and \$B index values.
- An impressive prospect produced by a first calf heifer we purchased in the 2025 Lazy H Ranch Production Sale, Hays, KS.
- The maternal grandam has been a prolific donor for Brinkley Angus Ranch and Lazy H Ranch producing featured lots in their past production sales.

- The highest CED EPD in the offering, this balanced trait bull combines relevant traits to have an upper percentile ranking for \$C.
- This True Balance son came to SydGen at side of his dam in the 2025 Express Ranches Big Event Sale. A little older than the bulls raised here, his performance cannot be fairly compared, but his actual weight on May 22 was 956, and on September 14, he weighed 1360. He was fed with this group of bulls and gained 3.51 lbs./day for that feeding period.
- Dam is a granddaughter of the highly sought-after Sitz Henrietta Pride 643T that has left an immeasurable impact improving the Angus breed.

- This set of Wizard sons have the genetic potential to improve muscle and carcass quality to garnish premiums available in the beef industry today.
- The donor dam has 3 natural calves average weaning ratio 103, and 2 yearlings average 108, and she came to SydGen from Blue Mound Angus, El Dorado Springs, MO.
- A maternal brother sired by Hennessey sells as Lot 27, with a maternal brother by Executive selling as Lot 127. Maternal sister by Southland sells as Lot 193.

- If the focus is on increasing pounds, consider this powerful flush of brothers sired by Ambitious, stemming from one of the strong cow lines developed at SydGen.
- John David Todd, Norman, OK purchased one-half interest in the dam featured as Lot 1 in the 2022 SydGen sale for \$15,000 as an open heifer.
- Dam has 3 natural calves average weaning ratio of 103, and 2 yearling progeny average 106.
- Schallberger Land & Cattle, Cape Girardeau, MO bought a maternal brother for \$11,000 in our 2025 production sale.
- A maternal sister sold in the 2024 SydGen sale for \$17,000 to Belle Point Ranch, Lavaca, AR.
- Turner Farms, Belgrade, MO purchased the maternal grandam in the 2024 sale for \$7,000, and her 4 natural calves at SydGen posted an average weaning ratio of 112, with 3 yearlings at 112.
- A flush sister is featured as Lot 10, and maternal brothers by Hennessey sell as Lot 25 in the spring bull division.

Cowboy Logic #20

One of the toughest decisions we make each year is determining which genetic values and what performance data should be printed in the sale book. Our preference is to print the data most breeders use in their selection decisions, and that is what we believe we have included. We also prefer to condense the data as much as possible, so the information is easier to read and quicker to comprehend when one is making decisions at the pace of an auction sale. This year, we added all three of the new EPDs. Though breeders might not be using them much at this point, we all need to become familiar with them. Meanwhile, all registration numbers are provided here, and every EPD and bio-economic index is available to you on the EPD/Pedigree Lookup page at www.angus.org. On sale day, the most current EPDs on all Lots will also be posted.

To save space, we did remove Dam Progeny Records last year, but all that information is available to anyone who asks, and we will try to post them on sale day, if we can work through the logistics.

- This is a natural calf out of a donor female in our joint venture with Greiner Angus, Kalona, IA.
- Proven herd bull lineage, the dam is a flush sister to the \$35,000 Southland owned by Amoret Farms and Mershon Cattle LLC; the \$22,000 Leader bought by Mogk & Sons; the \$22,000 Enlist owned by Bernard & Carla Taylor; and the \$12,000 Volunteer 3721 purchased by D & R Angus, Buffalo, MO. Maternal brother featured as Lot 114.
- Flush sisters to the dam sold in the 2024 SydGen sale for \$25,000 to Pollard Farms, Waukomis, OK, and for \$11,000 to Brinkley Angus Ranch, Milan, MO and Lazy H Ranch, Hays, KS.
- We purchased a maternal brother to the dam, Skillset in the 2025 Brinkley Angus Ranch Sale for \$32,000.
- Greiner Angus purchased the maternal grandam in our 2022 production sale with one-half interest selling for \$30,000.

- This bull is a commercial bull without registration papers or EPDs, sired by the \$20,000 Blanton.
- Given his genomic scores and his actual birth weight and pedigree info, he should be heifer-friendly.
- Obviously, he is a real good calf. We don't do this very often.

- Solid EPD profile on this real complete, heifer friendly stock bull.
- A maternal sister sired by Black Pearl sold in the 2024 SydGen Production Sale to Carl Evers, Virginia, IL.
- Dam has 2 natural calves with an average weaning ratio of 113.
- The maternal granddam was a donor in our ET program, producing 3 natural calves average weaning ratio at 104.
- SydGen Fanny 4079 had a productive donor career here, then sold to Stan Leaders, Minden, IA in our 2021 sale.
- Bob Vandiver Cattle Company, Richmond, MO purchased a maternal sister to the dam in the 2026 sale for \$6,000, with their other maternal sisters selling in past sales to JNS Cattle Company, Bloomfield, IN, to Frank Greiner, Washington, IA, and to Paul Steckler, Ferdinand, IN.

- The number one individual WW EPD bull in his group, he also ranks in the upper percentiles for CW, RE and YW EPDs, as well as \$W and \$C index values.
- He also posted the top adj. WW and YW in his contemporary group, which was 53 head at weaning time.
- Dam has a proven track record with 4 calves average weaning ratio at 107, and she sells as Lot 268.
- The third dam, SydGen Rita 5730, was the \$100,000 valuation donor co-owned with Express Ranches, Yukon OK.
- Wallis Angus Farms, Millersville, MO bought a maternal sister through the 2025 SydGen sale for \$4,750.

- The number one bull in the sale offering for the \$C index, as of this writing.
- Dam is a Volunteer daughter out of the \$60,000 valued donor that sold in the 2022 SydGen Production Sale to Greiner Angus, Kalona, IA.
- SydGen herd sires that are flush brothers to the dam include the \$35,000 Southland, the \$22,000 Enlist, and the \$22,000 Leader.
- Other maternal brothers to the dam include one to Mershon Cattle LLC, Buckner, MO at \$13,000, two going to D&R Angus, Buffalo, MO for \$12,000 and \$6,750, and two purchased by Jerry Maas, Quincy, IL at \$13,000 and \$4,500. Brinkley Skillset 3866, the \$32,000 sale-topper to SydGen from the 2025 Brinkley sale is also a maternal brother.
- A maternal sister to the dam is the Lot 1 heifer this year, and maternal brothers to the dam are features selling as Lots 76A - C in the fall bull division, and as Lot 17 in the spring bulls.

- Dam came to SydGen as a bred heifer in the 2021 Soaring Eagle Farms Production Sale and has been a consistent producer with 5 calves average weaning ratio at 104, and she sells as Lot 247 in the fall calving division.
- Venters Bros Farm, Sedalia, MO bought a maternal brother in the 2023 SydGen Production Sale for \$6,000.
- Upper percentile ranking for \$W index.

Tips on Using Yearling Bulls

Yearling bulls have many advantages: fresher genetics, better selection, etc. Studies have shown bulls used as yearlings sire more calves in their lifetime than bulls held until they are two. Also, buyers who manage them well can often re-sell them as three or four-year-olds and recover much of their purchase price.

A few tips from our experience:

- If your group has too many cows or heifers for one yearling bull (we suggest 10-15), don't put all the bulls out at the start of the season. If you turn them all out at once, they are likely to all lose weight and perhaps all go temporarily sterile at the same time. If you have two bulls, put one in for two weeks, then pull him and turn out the other one. The forced rest and a little feed and fly control will make him stronger. Using the every two week rotation, if one bull is a stronger breeder, he will always be covering what the other bull missed. Furthermore, running multiple bulls in the Midwest often results in broken penises; it's just different out West where the pastures are so much larger.
- A yearling bull should not be out in a Missouri pasture from mid-July through August. Bulls generally shed their first two incisors about 18-20 months of age. That combined with fescue endophyte and heat stress could cause the bull to get so nutritionally stressed that it will take a long time to get him back in shape.

- This flush of Clarity sons produced by a Pathfinder Dam all ring the bell for exceptional growth EPDs while generating upper tier index values across the board.
- A full brother sold in the 2025 SydGen Production Sale for \$9,500 to Weiker Angus Ranch, Fayette, MO.
- A maternal brother sold in our 2024 sale to Bruce Coleman, Perry, MO.
- The dam has weaned 4 natural calves with an average weaning ratio of 105, with her most recent calf selling in the fall bull division as Lot 151.

CED vs. BW

Which number should one consider strongest when purchasing a bull to use on virgin heifers?

This question comes up often in discussions. If you talk to a geneticist, CED is always the answer, because calving ease is what you are looking for, and that is the actual trait reflected by a CED EPD. Birth Weight (BW) is an indicator trait, but not the actual trait of economic importance.

However, one thing we think about pretty often is the fact that a lot more data affects the BW EPD than the CED EPD. First of all, CED EPD is based only on pulls and unassisted births out of first calf heifers. No data from second-calvers and older is counted at all. Secondly, if all the calves are born unassisted, it does not affect the CED of any of the sires, other than the influence of the birthweights on the BW EPD, which would have some correlated effect on CED EPD. That would mean most of the data from small herds would count very little, since the odds of pulling a calf on a small number of heifers is very small. Also, no pulls on ET calves are counted. In the big scheme of things, the number of pulls turned in is a pretty small number, and it seems to us that it could skew the CED EPD

Lots 158 through 167 were raised in a cooperator herd. All the recipients were commercial cows. As you can see, the raw performance is a fair amount less than the calves raised here at SydGen. These embryos have some potential and the donors are cows we thought enough of to want multiple progeny from them. Odds are, they will get better and better as they mature.

- Cunningham Farms, Molino, FL purchased a maternal brother in the 2025 SydGen Production Sale for \$16,000, with maternal brothers selling in our 2023 sale to Zoe Moritz, Fairfield, IA, to Bryan Switzer, Bucklin, MO, and to Curtis & Michelle Smith, Fulton, MO.
- Zachary Daniel, Lockwood, MO bought a maternal brother in the spring of 2025 for \$5,500.
- Dam is one of our favorite Enhance daughters that has 4 natural calves with an average progeny ratio at weaning of 105, and a flush sister to these bulls sells as Lot 237.
- Dam is maternal sister to SydGen herd sires, Whiteman and the \$25,000 Brickyard.
- The maternal grandam is a Pathfinder Dam with 5 calves weaning ratio 113, yearling ratio 109.

pretty strongly in either direction in a good luck/bad luck scenario.

Birth weights, on the other hand, are generally turned in, and processed, on a very high percentage of calves turned in on AHIR. Sire summary supplemental information shows over 5 times as many birthweights reported as there are calving ease scores.

- A pair of flush sisters with higher growth predictions that filter to the top of the offering for the \$W index value, and their two flush brothers sell as Lot 82.
- The donor dam, Vintage Blackbird 0011, sold in our 2024 sale to McCloud Farms, Jayess, MS for \$8,000.
- A maternal sister produced a son selling in the fall bull division as Lot 83.
- The Volunteer daughters have made tremendous young females in production, and these trace to the high impact donor in the Vintage Angus program, Sandpoint, Blackbird 8809.

- Flag Ranch, Torrington, WY bought a maternal brother in the 2023 SydGen Production Sale for \$8,000.
- This heifer posts a top-tier \$W index among the fall heifers in the offering.
- Dam came to SydGen as a two-year-old with a calf at side in the 2022 Spruce Mountain Ranch Production Sale, and is a granddaughter of the foundation SydGen sire Enhance.

Heifer Replacement Program

To qualify as a service sire for heifers in SydGen Influence Sales, the sire must be +1.0 or lower BW EPD OR +7 or higher for CED EPD, and must carry the SydGen prefix in his name, or be a graduate of the SydGen Influence sale. To qualify as a natural service sire for heifers in Show-Me Select Heifer Sales, the sire must be +7 or higher for CED if he is an Angus, and he must be genomic tested.

- This heifer was purchased at side of her dam in the Fall 2025 Mead Farms Production Sale, Barnett, MO.
- Sire is a son of G A R Sunbeam that is featured in the ST Genetics bull lineup.

Cowboy Logic #101

"A contemporary group is a set of animals that have had an equal opportunity to perform: same sex, managed alike, and exposed to the same environmental conditions and feed resources. Contemporary groups are the cornerstone of genetic evaluation. They are the best way to account for environmental effects so that remaining differences among animals may be attributed to genetics, ultimately resulting in expected progeny differences (EPDs)."

--- American Angus Association

We take proper contemporary grouping very seriously at SydGen. We try to keep our contemporary groups as large as our pastures and facilities allow, and run them as "same sex" pastures whenever possible. It is every Angus breeder's responsibility to do the most accurate job possible turning in data, and proper contemporary grouping is the very most basic concept for National Cattle Evaluation.

SydGen Prefix

For those of you new to our program, we operated as Sydenstricker Angus Farms for many years and used the "S A F" prefix to name the cattle born here. Beginning with the Spring 2001 calf crop, we have operated as Sydenstricker Genetics, both to signify the business we are in and to bring forth a unique new logo and naming prefix for our cattle, "SydGen." That is why you will see many SydGen pedigrees with "S A F" sires and dams.

- Dam has 4 calves at 105 for weaning and 6 ultrasound progeny have a ratio for IMF at 115.
- Flush brothers to this heifer sell as Lots 160A - C.
- A maternal brother sold in the 2025 production sale for \$16,000 to Cunningham Farms, Molino, FL, with other maternal brothers selling to Zachary Daniel, Lockwood, MO, Zoe Moritz, Fairfield, IA, Bryan Switzer, Bucklin, MO, and to Curtis & Michelle Smith, Fulton, MO.
- SydGen Primrose 6220 is a Pathfinder Dam with 5 calves weaning ratio 113, yearling ratio 109, and she is also the dam of SydGen sires Brickyard and Whiteman.

Actual Scan Data

Actual scan data on all fall yearling bulls and heifers will be included with your update sheets on sale day and posted on the web prior to the sale. This actual data has already been incorporated into each animal's carcass EPDs printed here, and we believe these EPDs are a better indicator of the animal's carcass genetics than one ultrasound reading.

Herd Units

This is our 22nd year of selling herd unit groups of heifers, and it has been well-accepted. As our herd expands and the size of this sale grows, we think it makes sense to sell these closely related groups of sisters as packages of two to five head at a time.

- A special highlight to lead off the fall calving division, SydGen Blackcap 8865 marked a place in SydGen history as the record selling female in the 2019 SydGen Production Sale selling for \$150,000 to Spruce Mountain Ranch, Larkspur, CO and Crazy K Ranch, Michie, TN.
- We had the opportunity to re-purchase 8865 in the 2022 Spruce Mountain Ranch sale, and later that fall in the SydGen sale we sold one-half interest in her daughter that was at side to Greiner Angus; also in that sale Brinkley Angus Ranch, Milan, MO purchased a flush for \$17,000.
- Pollard Farms, Waukomis, OK bought a daughter, SydGen Blackcap 3739, in the 2024 SydGen Production Sale at \$15,000, with flush brothers to that heifer selling to Jackson Farms, Hartville, MO for \$8,000, and to Wheeler Angus, Paris, MO at \$7,500.
- JNS Cattle Company, Bloomfield, IN bought a daughter in 2024, and sons also sold in that sale to Bean Creek Angus, Mexico, MO, and to Otto Farms, Leonard, MO.
- Paradox Farms, Bolivar, MO bought an IVF embryo package in the 2025 MO Angus Futurity Sale for \$7,800.
- Son sells as Lot 50.
- Has produced 95 IVF embryos in 14 aspiratons, and 5 daughters retained.
- Due in early November to Connealy Zenith 3133.

- This daughter of Gavel was bred at Fair Oaks Farm, Fort Smith, AR, purchased as a bred heifer in the 2022 Belle Point Ranch Sale, and is a donor in our ET program that compiled an impressive production record at SydGen.
- A son was the second top-selling bull in the 2025 SydGen Production Sale going to Amonett Farms, Byrdstown, TN for \$28,000.
- Dustin Cornman, Aurora, MO purchased a daughter in the 2025 SydGen sale, and sons have sold in past sales to Laverne Schlabach, Richmond, MO at \$7,000, to J & J Ranch, Long Grove, IA, and to Craig Cattle Farms, Florence, MO.
- Due in October to G A R Verified 2683.

- The dam had 3 ultrasound progeny with an average IMF ratio of 128, and she sold in the 2025 SydGen Production Sale for \$6,500 to Spruce Mountain Ranch, Larkspur, CO.
- Has a heifer calf (Lot 263A), calved September 22, 2026 by SydGen Gavel 3008. BW 49 lbs.

Cowboy Logic #456

We are often asked how we pick the sale cattle. Bulls are pretty much selected by birth date. All fall yearling bulls that are saleable are in the sale. When we start calving in January, we put January bull calves into one pasture or two, and when that is full, with 100+ head or so, those are the bull calves for the sale. These calves are culled at weaning for performance, scrotal size and structure. Later calves are used for the SydGen Influence Bull Sale in the spring, replacement bulls, or private treaty sales. Cows are primarily selected from the six and seven year old cows, with a "mandatory retirement age" of seven, except in certain cases when one was held an extra year so we could get a heifer calf to replace her. We are now trying to sell more cows as two to five-year-olds. Our fall heifers are basically split down the middle in May after weaning, with half going in the sale and half retained. Flush sister and sire groups are split as well, to make the sale offering and the keeper heifer group very similar. Spring heifer calves are pretty much done the same way, although only a third of our heifer calves are sold as heifer calves to allow us to have bred heifers for the next sale.

- A big growth female combined with balanced carcass merit to deploy top percentile ranks for \$W, \$B and \$C indexes.
- This female came to SydGen through the 2025 Circle F Farms Production Sale, Baxley, GA.
- Has a bull calf (Lot 297A), calved September 6, 2026 by AAA True Blood 3553 out of the cow selling as Lot 280. BW 52 lbs. Long story short, we found her claiming this calf and another one....assumed she had twins, but DNA says she did not, and we had already grafted her calf on to a two year old that had lost her calf. So this is the way they are paired up, and that's how they will sell.

+12	-1.7	+65	+121	+45	+33	+13.9	+2	+26	+88	+79	+1.13	+30	+47	+99	+74

- Sire of this heifer calf was a Bonus son we used in natural service with a 113 weaning ratio, and he is now working for Scott Davidson, Grant City, MO.

The \$ Indexes

We now have six bio-economic Indexes available on Angus cattle. \$Weaning is a measure of the economic impact of four primary areas affecting animals from birth through weaning. Those four areas are birth weight, weaning weight, maternal milk, and mature cow size. It assumes an 80-20 mix of cows to heifers. \$Feedlot is a measure of the value associated with post-weaning growth along with feed efficiency. \$Grid is actually a measure of total end-product value on a quality grid, using ultrasound and carcass data when both are available. \$B is a combination of YW, CW, DMI, marbling, ribeye area and fat thickness into a terminal post-weaning value.

\$Maternal Weaned Calf Value includes CED, CEM, WW, Milk, HP, docility, mature weight, FL, and claw and angle EPDs to predict the profitability differences on a weaned calf basis.

\$Combination is the other newer index available that attempts to measure the combined economic impact of an animal on a dollars per head basis. It is computed by multiplying the \$Beef Value by 1.297, and adding that number to the \$M value. (This approximates a 20% replacement rate.) \$C has quickly become a driving force in the value of Angus breeding stock.

With any index, there are assumptions made which may or may not fit your particular operation. For instance, if you are going to use a bull on cows only, the bias toward lower BW in the \$W and \$M indexes may not be needed. If the bull is going to be used solely on heifers, you may need more bias toward lower birth weights. If you have unlimited feed resources, the bias toward smaller mature size in the \$W index may not be needed.

The same holds true for particular carcass traits. If you have feedlot and kill data on your cattle, you can fine-tune your growth and carcass trait needs more accurately with individual EPDs than with the \$B index. Actually, as the price of beef has driven \$B values higher the last few years, Carcass Weight (CW) is a dominant component of the \$B computations. If you are already pushing the limits of over-weight carcasses, you may need to select for less CW EPD, therefore making some higher \$B bulls less desirable in your scenario.

We do believe the \$C index is suited very well for most of our customers, and we are including it in this sale book on every animal. We are not printing \$G on each lot, as we think most of you prefer to look at the EPDs themselves for the four carcass traits. We still might reference \$G in a footnote if the animal is exceptional.

On sale day, every EPD and every bio-economic index will be posted for every animal, as of November 20.

- This Validate heifer is produced by a dam that has generated impressive progeny ratios on her first 3 calves for yearling weight, IMF, and Ribeye.

Genomics

Genomics have become more and more important to NCE, and their impact will continue to grow. As a herd that turns in a lot of phenotypes (data) to AHIR, we have already built up the accuracy, and the genomics just adds to it. We turn in some 15,000 pieces of information to AHIR yearly.

We have seen the genomic scores lining up closer and closer to the performance of the cattle over time, and have genomic tested every bull calf in the offering for several years. The added plus, besides offering the latest technology, is the parent verification that is included with the testing.

We feel the most value is for those younger cattle who have not had gain and ultrasound information processed yet, individuals who land in very small contemporary groups, and ET calves who happen to draw a bad recip or an exceptional recip. We do agree the best way to utilize genomic predictions is to integrate them into the EPD system, just as AAA is doing. We also believe genomics is just one more competitive advantage where the Angus breed is the leader.

We do not believe genomic testing can or should be used as a substitute for actual performance testing. We still need that good data, in proper contemporary groups, to train the markers properly.

For those sale animals already genomic tested, and incorporated into their EPDs, there will be an HD 50K or AngusGS logo in the book for that animal. This year we tested all 2025 calves and all the fall yearlings. Please check our website, and we will post all genomic results, as well as having them available on sale day. Also, on sale day, we will have a print-out posted by the office with the most up-to-date EPDs available on every sale animal, as of the November 21 NCE run.

Performance Information

The EPDs printed are all from the Fall 2026 Sire Evaluation Report.

Progeny ratios are printed on cows as of October 1. (Example: BWR 6-103, WWR 6-102, YWR 3-104 means the cow has six calves weaned or recorded with an average weaning ratio of 102, those 6 calves had an average birth weight ratio of 103, and three of those had yearling weights turned in with an average ratio of 104.)

We print ratios because many of our customers like to see them. But because of differences in the performance levels between herds and contemporary groups, and a multitude of factors that can affect any one individual weight (which is the basis for the ratio), EPDs HAVE BEEN SHOWN TO BE AS MUCH AS NINE TIMES MORE ACCURATE THAN RATIOS AS A SELECTION TOOL.

(Consider the three to four hours that it takes to weigh and vaccinate a set of 110 bull calves on weaning day. There will be considerable difference in fill between the first calves weighed and the last calves weighed.)

All spring calves in this sale have had birth and weaning weights processed through AHIR, and the EPDs printed reflect that data. Data from those calves has been used to update the progeny ratios of their dams, where applicable.

Also on sale day, we will furnish current weight, frame score, average daily gain, and projected yearling weights on the spring bull calves. Projected yearling weights are calculated by multiplying their post-weaning ADG by 160, and adding that result to their adj. 205-day weight. This is not an official 365-day weight.

In this catalog, you will see ratios for BW, WW, and YW on some of the ET calves. The Association is supplying this information, and adjusting the interim EPDs accordingly, for those calves born out of registered Angus recipient cows. This methodology is called the three parent model, due to the two genetic parents and the influence of the environmental parent, the recipient dam. These ratios are determined within their weaning contemporary group and within those ET calves raised by registered Angus recipients, after adjustment for age of dam. This may be confusing at times, especially when some calves within a flush were raised by a registered Angus recipient and some were not.

ET calves raised by commercial recipients and those produced by IVF, will still carry EPDs that are the average of their sire and dam plus the genomic influence, and are lower accuracy than their counter-parts raised by a registered Angus cow.

- Adam Fischer, Saint Meinard, IN purchased a daughter sired by Cool in the 2024 SydGen sale.
- The dam had 3 progeny with an average weaning ratio of 103, and she had a daughter that sold to Craig Cattle Farms, Florence, MO; Bradley Cattle, Marshfield, MO bought two daughters in past SydGen sales.
- Bred March 28, 2026 to EXAR Anticipation 4836B #21053047. Exposed April 12, 2026 to June 7, 2026 to Von Audrain L940. Preg Check indicates conception on about March 28 with a heifer calf.

Adaptability

We feel one of the best advantages to buying cattle here is due to our location in the central U.S., and the additional stress this herd has to endure from fescue and humidity. We've sent cattle to Florida, old Mexico, south Texas, Montana, Michigan, and Canada, and the reports are all consistent. These cattle are acclimated to extremes of heat and cold and can adapt to about any climate where cattle are raised.

- SydGen purchased one-half interest in the dam of this heifer in the 2023 Frank/Hazelrigg Cattle Company Production Sale, and she has 2 calves at SydGen with an average IMF ratio of 123 and Ribeye 108.
- A maternal brother sired by Audrain sells in the spring bull group as Lot 37.
- Cunningham Land & Livestock, Chesterfield, IL bought a maternal sister to the dam in our 2025 sale for \$7,000.
- Bred April 2, 2026 to Worthington Loyalty. Exposed April 30 to June 15, 2026 to SydGen Solar GA 5188. Preg Check indicates conception on about May 9 with a heifer calf.

Cowboy Logic #31

We are often asked about nutrition. Our basic philosophy is to have the nutritional level strong enough to allow genetic differences to be expressed, but not high enough to mask those differences. Our creep feed is predominantly a commodity mix. Fall heifers are generally creep fed, but we take them off of it in March or April, when the grass starts coming, if there are no bull calves in the same contemporary group. Spring sale heifer calves are only allowed access to creep at about 60 days pre-weaning, and the keeper heifer calves that become the bred heifers in today's sale are not creep fed. Heifers are fed supplemental feed through their AI breeding at 14-16 months of age. After that point, they are totally on grass the rest of their life here, except for silage and hay as needed during the winter. Our pastures are predominantly K31 fescue, but we do try to keep a good stand of clovers and lespedeza in them. We utilize rotational grazing as much as possible.

Fall bulls after weaning are self-fed Purina Bull Developer on fescue paddocks until yearling weights are taken, then switched over to hay, silage, and limited grain. The January bull calves are hand-fed from weaning to sale day on a 2/3 oats, 1/3 corn ration with limited silage.

- This heifer stems from a strong maternal base, with the maternal grandam producing 5 calves with an average weaning ratio of 113, earning the Pathfinder Dam recognition.
- Express Ranches, Yukon, OK purchased a maternal sister to the dam sired by Enhance in our 2017 production sale for \$29,000.
- A full sister to the dam sold to JNS Cattle Company, Bloomfield, IN, and their maternal brothers are working for Wards Angus Farm, Palmersville, TN and Ed Coe, Shelbyville, MO.

Replacement Policy

We guarantee that all bulls and females over 7 months of age at time of sale are fertile. If you have an infertility problem with any SydGen animal, you must contact us before culling the animal for any credit to be issued. It is the buyer's responsibility to return the animal to the seller in good breeding condition. SydGen reserves the right, on a case by case basis, to determine whether the animal be returned or sold for salvage.

If a bull does not pass a breeding soundness evaluation or does not settle cows naturally, we will provide you with a satisfactory replacement or issue you a credit equal to the bull's purchase price minus the salvage value received for that bull. If the animal is returned, the credit will be for the full amount paid for the animal. This credit will include the cost of the wintering fee if that service was used, and can be used at any future SydGen or SydGen Influence Sale toward any animal sold by us.

If a female is determined to be a non-breeder, we will offer you the difference of her purchase price minus her salvage value as a credit in any future SydGen Sale. Or, we will credit you with the full purchase price if she is returned. If a female sold as bred turns out to be open, we will refund 30% of the amount paid. She then would still qualify for the remainder of the credit if she does not breed back. Heifers that are flushed prior to having their first calf carry no breeding guarantee. Guarantee is null and void if the animal dies. This guarantee is in addition to the Sale Terms and Conditions of the American Angus Association, which also apply.

Sydenstricker Genetics

We are proud to receive
GOLD recognition in the
Data Drive program
for 2026.

COMMITTED TO DATA COLLECTION

The Data Driven Herd program recognizes American Angus Association® members committed to the collection and submission of data on multiple traits to AHIR® to help better characterize phenotypes in both their herd and the Angus breed.

Participating herds collect a minimum of 8 to 12 traits of their choosing on a corresponding percentage of their herd and submit the data annually to AHIR to earn Bronze, Silver or Gold level recognition.

Scan to learn more about the program
or head to qrco.de/DataDrivenHerdInfo

Thank You For Another Great Sale!

188 buyers from 19 states appraised the 463 head offered at \$3,241,750 to average \$7,001. We extend a special thank you to the following buyers and the many other bidders who helped make this event our 22nd million-dollar-sale, and our first three-million-dollar-sale. 150 buyers (80%) were repeat customers.

We would like to thank all the auctioneers, ringmen and sale crew who helped make this sale successful.

A complete list of all individual prices can be found at www.sydgen.com.

SYDGEN LADY 5057

Thanks to Express Ranches, Yukon, OK, and Pollard Farms, Waukomis, OK, on their purchase of the top-selling female in SydGen history at \$160,000. She's a January daughter of RSA True Balance 1311 and Pollard Lady 1506.

SYDGEN STABILITY 4577

Also for the first time in history, our top-selling bull and female were flush-mates. SydGen Stability 4577 is a flush brother to the 5057 heifer, also sired by True Balance and out of Pollard Lady 1506. Thanks to Brinkley Angus Ranch, Milan, MO, and Mead Angus Farm, Barnett, MO, for their purchase at \$33,000 for half-interest and full possession.

SYDGEN PRINCESS 4020

Second high-selling female at \$62,500 for one half-interest is this bred heifer by SydGen II Lombardi 9045 "Vince", selling to Greiner Angus, Kalona, IA. Greiner also purchased the top-selling fall yearling heifer, SydGen Rita 4502, at \$50,000 for one-half interest.

ALSO SPECIAL THANKS TO THE FOLLOWING BUYERS:

- **Amonett Farms**, Byrdstown, TN, for their purchase of the second and third high-selling bulls: SydGen Congress 4518 at \$28,000 and SydGen Verified 4527 at \$26,000.
- **BCAngus**, Adair, IA, for their purchase of the top-selling fall pair at \$15,000, a daughter of SydGen Liberty 3748 with heifer calf by RC Complete K106 and the \$25,000 fourth-high-selling bull, SydGen Verified 4526, along with Metz Farms, Fulton, MO.
- **Bradley Cattle Co.**, Marshfield, MO, and **Haerr Farms**, Taylor, MO, were the volume buyers.

29TH ANNUAL SYDENSTRICKER INFLUENCE COMMERCIAL HEIFER SALE

John Payne Harrison
Jack Harrison
(573) 642-7486

at Callaway Livestock Auction, Kingdom City, MO
6 p.m., December 3, 2026 • Selling 70 Heifers

Located four miles east of the junction of U.S. 54 and Interstate 70. Turn on the SE outer road (at the first spotlight south of the I-70 overpass), and follow it back north, then east, about four miles.

Mershon Cattle LLC, Buckner and Appleton City, MO
Bruce and Tracey Mershon 816-289-3765 (C)
bruce@mershoncattle.com / www.mershoncattle.com

35 BLACK AND BWF BRED HEIFERS

All were AI bred to SydGen Black Pearl 2006 (Reference Sire J) on May 21-22, 2026. From June 9, they were exposed to sons of SydGen Blueprint, URF Alpha G138, SydGen Bonus 8084, De-Su Volunteer B122, GAR Verified 2683, Bakers Northside 6007, SydGen II Lombardi 9045, HPCA Early Bird 65 and SydGen Exceed 3223. All sires have CED of +7 or better, with genomically enhanced EPDs, the same requirements as Show Me Select service sires.

Heifers were ultrasounded and fetal sexed in August. They will be sorted by expected calving date and sex of the calf, and all heifers selling will be due by March 20, 2027.

25 BLACK AND BWF TWO-YEAR-OLD PAIRS

Calves will all be about 30-45 days old on sale day. These are all naturally sired by SydGen bred bulls that are sons of SydGen Blueprint, URF Alpha G138, Bakers Northside 6007, HPCA Early Bird 65 and SydGen Exceed.

Mershon Cattle is a commercial cattle operation run by the Mershon family in western Missouri. This is the thirteenth consecutive year that Mershon Cattle has sold bred heifers in the SydGen Influence Commercial Heifer Sale. For seven years, they have also sold pairs in the Spring SydGen Influence Sale. They have been using SydGen bulls and semen since 2004. Their herd consists of Angus based, cross-bred cows that have been AI bred using Angus, Hereford and Simmental semen. Steers are retained and sold on the grid. A recent pen of steers walked into Darr Feedlot at 977 pounds, yet gained 4.4 pounds/day for the feeding period, then earned \$7.25/cwt. Premium over the base grid. Mershons' have also had many high-placing steers in the MCA Profitability Challenge.

All heifers offered are from Mershon Cattle's home-raised cows. Mershon Cattle LLC was awarded the 2013 Missouri Angus Association Commercial Producer of the Year Award.

In 2019, they received the BIF Commercial Producer of the Year Award, the most prestigious in the industry. Bruce is Past President of the Missouri Cattlemen's Association and Tracey is a Region 1 Board Member for the Missouri Beef Industry Council.

Bring Your Semen Tank Sale Day

If you place your semen order with Ben or Darla at the SydGen office by November 1, 2026, we can have semen on ANY ORigen sire available to pick up at the farm on sale day with no shipping charges. Of course, most SydGen sires are available sale day. For sire information, check the front 12 pages of this sale book, or visit www.sydgen.com

Marketing Opportunities

Sydenstricker Genetics recognizes that being a Full Service Genetic Provider only begins when you buy a bull. There are programs that could help you market your feeder cattle, so feel free to contact us to discuss those programs, including AngusLink, Top Dollar Angus, MFA Health Track Alliance and U.S. Premium Beef.

EPDs

We have the following abbreviations throughout this book with regard to EPDs. Remember that an EPD is an estimate of how future progeny will perform, relative to other Angus cattle with EPD values. The accuracy figure, just after the EPD, indicates the possible future change in the EPD. The higher the accuracy, the less likely the EPD will change appreciably.

BW – Birth weight, expressed in pounds.

WW – Weaning weight, expressed in pounds adjusted to 205 days of age.

Milk – Influence of the dam, due to her milking ability, on weaning weight, expressed in pounds of calf weaned.

YW – Yearling weight, expressed in pounds adjusted to 365 days of age.

RADG—Residual Average Daily Gain is expressed in pounds per day, and predicts the animal's genetic ability for adding postweaning gain, given a constant amount of feed consumed.

HS—Hair Shed EPD is expressed in units of hsr shed score, with a lower EPD being more favorable to shedding their winter coat earlier in the spring. Selection for this trait should improve the genetic potential for a sire's progeny to shed off earlier, increasing the environmental adaptability of cattle living in heat stressed areas and producers grazing endophyte-infected (hot) fescue.

CLAW—Claw shape is expressed in units of claw-set score, with a lower EPD being more favorable to produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

ANGLE—is expressed in units of foot-angle score, with a lower EPD being more favorable to produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CW – Carcass weight, expressed in pounds at a given end point.

MB – Marbling, expressed as a portion of a marbling score (one point of marbling score = 1/3 quality grade).

REA – Ribeye area, expressed in square inches, at a given end point.

FT – Fat thickness, expressed in inches, at a given end point.

SC – Scrotal circumference, expressed in centimeters, at a year of age.

CED—Percentage of unassisted births when a sire is mated to virgin heifers. Higher values indicate more unassisted births.

CEM—Percentage of unassisted births as first calf heifers.

DOC—Percentage increase in number of progeny scoring 1 (most docile)

HP—Percentage increase in number of daughters pregnant in their first breeding season.

TEAT—Teat size, with a larger EPD indicating a smaller teat.

UDDR—Udder size, with a larger EPD indicating a smaller, tighter udder.

FL—Functional Longevity attempts to measure likelihood of a cow staying in the herd and maintaining a yearly calving interval, without being culled or dropping back a season. Larger numbers indicate more likelihood the females will remain in the herd longer.

CW, MB, RE and FT EPDs are generated by actual carcass data, ultrasound scans and genomics.

Remember that no EPD is an absolute. It simply allows you to compare genetic differences in sires. As an example, if you were to use a high accuracy +30 WW EPD sire in your herd, and the weaning weights average 550 pounds, then you could expect a high accuracy +40 WW EPD sire to sire calves averaging 560 pounds, if used in exactly the same situation. A sire with a +6 BW EPD should sire calves averaging 4 pounds heavier at birth than a sire with a +2 BW EPD.

Results of the MCA Profitability Challenge

2026 marked the seventh year of the Missouri Cattlemen's Association Profitability Challenge. We are proud to have placed second in this year's contest, holding our own in this unique contest that measures all feed consumed, treatment costs and harvest value for an accurate assessment of the profitability of the steers in the contest. The contest is held at the University of Missouri South Farm, and uses the GrowSafe system to measure feed intake. We placed first in 2020 with a son of SydGen Wake Up Call 9446; second in 2021 with a son of SydGen Exceed 3223; fourth in 2022 with a son of SydGen Wake Up Call 9253; third in 2023 with a son of De-Su Volunteer B122; second and third in 2024 with sons of HPCA Early Bird 65 and SydGen Faith GA 0808; and third and fifth in 2025 with sons of SydGen Exceed 3223 and SydGen Gavel 0674.

We are the only breeder to have had a Top Five placing in every year of the contest. This year, our top finisher is a son of GAR Verified 2683 out of a four year old Gavel daughter. He gained 4.38 lbs./day for the entire 183 day period, then hung up an 878 lb. carcass that graded SLAB30, low Prime.

Meet the Team

BEN EGGERS

Who could have guessed that the young boy at the 4-H club meeting in Southeast Missouri watching the "An Angus in Your Future" filmstrip would grow up to work beside the star of that film to build an internationally known Angus program. Since 1982, Ben has been the steady presence at SydGen, working alongside the many dedicated employees past and present. Previously, Ben spent several years working for Millikan Stock Farm, Pfeifer Farms, Gibraltar Cattle Company and Macon Angus Ranch. Giving back to the industry that has given so much to him is very important. He is active and a past president of the Missouri Cattlemen's Association, American Angus Association and Beef Improvement Federation.

BUB RAITHEL

Bub first joined SydGen helping with the sale while his brother Ed was here, then came on full time from 2004 to 2010 and returned to SydGen in 2013 after a stint with Mead Farms. Perhaps best known for his preparation and exhibition of Angus cattle, he has previously worked full time for Circle A, Er-Lan-Del, Broken Lance and Fox Run. Today he is responsible for the donors, the Dodson Farm fall cows and half of the fall yearling sale bulls, as well as overseeing the day-to-day operations. Bub and his wife, Mandy, have two grown children and live on their own farm near Auxvasse and raise Angus cattle and Border Collie dogs.

BLAKE McDONALD

Little did 5-year-old Blake know when he started attending all the SydGen production sales with his dad that he would become a member of our team. Despite living two hours away, he is here some most weeks assisting Ben with marketing and catalog preparation. Blake holds a Bachelor's degree in Animal Science and Master's degree in Ruminant Nutrition from Mizzou and currently serves on the Executive Committee as a Regional Vice President for the MO Cattlemen's Association. He and wife, Emily, have two little girls and third child due in January.

KYLE VUKADIN

Kyle grew up with his dad running cows for long-time SydGen customer E.E. Robertson Farms in nearby Armstrong, MO. With that good training, Kyle came on board the team in 2006. He lives on the Garcia Farm with his sons Jayden (sophomore) and Jaxton (third grade). Kyle takes care of the largest group of fall calving cows and half of the fall yearling sale bulls.

KENNETH ROBERTS

Kenneth joined the our team in 2015 after graduating with an Animal Science degree from Mizzou. Kenneth is very inquisitive and is always learning, be it to better care for the cattle or a new hobby. He does the night calving of most all the spring calves and is the master at making sure every calf gets the very best start. Living at the HH Farm, he cares for the vast majority of the fall recipient herd and sale fall pairs.

CODY WHEELER

Cody is the "jack of all trades". Coming to the farm from the John Deere store in 2019, he keeps the equipment running and can fix practically anything. In the summer, he keeps everything mowed, trimmed and looking top-notch and in the winter keeps all the driveways and gateways open after snows and the waterers flowing. He's quick to help out with anything else needed. He and his wife Danica have a son that just started kindergarten.

TRISTAN CRICK

A Tennessee native and graduate of Oklahoma State, Tristan met his wife, Ally, while both were at OSU. Ally is from near SydGen and Tristan spent the summer of 2022 working here before joining us full time following graduation in 2023. Tristan cares for the fall yearling heifers, fall two-year-olds, spring heifer calves and the steers. In late December, he and Ally will welcome their first child.

JOSEPH SORIA

Joseph and his son moved to Audrain County this spring from Texas to join his family. He has responsibilities grinding feed, feeding silage and clipping pastures. He has a son in the fourth grade.

RONNIE GIBSON

Ronnie grew up on the land that is now the SydGen homeplace. Since 1999, Ronnie has been the "go to" for all things facilities and maintenance. At 82, he is slowing down a bit on the day-to-day work but is still on call to show us where all the water and utility lines are buried and help with tricky repair projects.

KEVIN SHOPHER

Good neighbors are SO important and we're lucky to have Kevin and his wife, Darlene, across the road from our Green Farm and all the spring heifer calf pairs. This summer he came out of retirement to help clip pastures and work around the farms.

DARLA EGGERS

Raised on a traditional small farm in Northwest MO, Darla was active in 4-H and local and state junior Angus associations before attending Mizzou and receiving a BS in Animal Science. She has previously worked for GlenKirk Farms, the American Hereford Journal, Missouri Pork Producers and Missouri's Cattlemen Foundation. Joining the SydGen team in 2009, she handles record keeping, AHIR submissions and data management for the herd, in addition to tracking semen and certificate sales and bull stud expenses, and accounts receivable.

48th ANNUAL PRODUCTION SALE

Saturday November 21, 2026, 10:00 a.m.

Selling 526 Head

69 Bull Calves	40 Heifer Calves
135 Fall Yearling Bulls	80 Fall Heifers
58 Fall Pairs	46 Bred Heifers
37 Spring-Calving Cows	

Sale Day Phones: 573- 581-1225 573-253-8588

Ringmen:

Don Birk 417- 876-4613, Special Assignment
Bill Bowman 816-752-0079, Method Genetics
Bruce Bradley 417- 848-3457, Missouri Beef Cattleman

ANGUS MEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

General Information

Health: All cattle will be accompanied with interstate health papers on sale day. Sydenstricker Genetics maintains a Certified Brucellosis Free Herd Number 322, and the cow herd is monitored for Johnes. All heifer calves weaned here have been officially calfhood vaccinated for Brucellosis. All fall-calving cows selling with calves at side are open. All cows have been vaccinated with BoviShield Gold 5, Spirovac VL-5 and Scourguard 3(k)/c, and poured for parasites. Calves have been vaccinated for IBR, BVD and PI-3, BRSV, Haemophilus, Mycoplasma, Pasteurella and 8-way Blackleg; de-wormed, and de-loused. Herd health is under the supervision of Dr. Lindsey Calhoun, Audrain Vet Clinic, 573- 581-4679.

Sale Location: Sydenstricker Genetics is located one mile south of Mexico, Missouri on Business Route 54. Mexico is 14 miles north of I-70 on Highway 54. Note: If traveling from I-70, take the first Mexico exit to the farm.

GPS Address: 3997 S Clark Street, Mexico, MO.

Insurance: Livestock insurance will be available at the farm sale day.

Trucking: Sydenstricker Genetics will assist with trucking arrangements, but buyers are responsible for all trucking expenses.

Interests Retained in Bulls: See page 31.

Wintering Program for Bulls: See pages 26 and 31.

Breeding Privilege: All females sell with a breeding privilege (two straws of semen and any paperwork necessary) to any living SydGen bull on which semen is readily available.

Embryo Guarantee: Any female selling for \$10,000 or more is guaranteed to produce at least 10 transferable embryos within four embryo flushes by an AETA certified technician. If less than 10 embryos are produced, Sydenstricker Genetics will reimburse the buyer up to one-half the purchase price, prorated to the number less than 10 are produced. (Examples: (1) \$10,000 cow produces no transferable eggs; \$5,000 will be reimbursed. (2) \$10,000 cow produces six transferable embryos; \$2,000 will be reimbursed.) Guarantee is null and void if cow dies.

Junior Programs: Any registered Angus heifer purchased by a Missouri Junior Angus Association member will be nominated for the Missouri Junior Jackpot Show. Any junior wanting his animal nominated for the Jackpot show must notify us.

Transportation: Private planes can land on the 5,500-foot runway at Mexico, Missouri (573-581-0162), which has a localizer approach for Runway 24. Commuter air service is available to Columbia Regional Airport (573-874-7508) on American Airlines, with connections to DFW, CLT and Chicago O'Hare; on United Airlines with connections to Denver and Chicago O'Hare; and on Allegiant Air to Orlando and Destin-Fort Walton Beach. The farm is located 103 miles from Lambert St. Louis International, 184 miles from Kansas City International and 46 miles from Columbia Regional Airport.

Shuttle service on Mo-X is available from St. Louis or Kansas City to Kingdom City (1-877-669-4826). We will pick you up from any location if you contact us ahead of arrival date.

If you are driving, be aware there is major construction on I-70 from St. Louis to Kansas City. Please allow extra time and be aware some exits may be closed, etc.

Terms and Conditions: Cattle will sell according to the Terms and Conditions as recommended by the American Angus Association. Also see page 94. All persons who attend the sale do so at their own risk, and Sydenstricker Genetics assumes no liability, legal or otherwise, for any accidents which may occur.

Inspection of Cattle: Cattle can be inspected at any time prior to sale day at the farm.

Performance Information: Complete performance information will be available. See pages 31 and 79.

Updates and videos: Sale updates will be available prior to sale day at www.sydgen.com. Videos of the bulls selling will also be available there, and at www.dvauction.com.

On-line Bidding: The sale will be broadcast on-line with DV Auction. Log on at www.dvauction.com or call 402-474-5557 with problems or questions.

We are an original seedstock partner in ORlgen, Inc., as well as the recipient of the 1997 CERTIFIED ANGUS BEEFTM Seedstock "Commitment to Excellence" Award, and the 2001 BIF Seedstock Produce of the Year Award.

CONGRATULATIONS TO MAGGIE THESSON ON HER RESERVE GRAND CHAMPION PHENOTYPE/ GENOTYPE HEIFER AT THIS YEAR'S MISSOURI STATE FAIR. THIS HEIFER WAS PURCHASED IN OUR 2025 SALE. HER MATERNAL SISTER SELLS AS LOT 328.

MERSHON CATTLE IS BRINGING ANOTHER OUTSTANDING SET OF TWO-YEAR-OLD FALL PAIRS AND SPRING BRED HEIFERS TO THE SYDGEN INFLUENCE SALE ON DECEMBER 3. MORE INFORMATION IS AVAILABLE ON PAGE 98

WHEN WE HAVE A MISFORTUNE TO HAVE A BOTTLE CALF, THE CALF COMES OUT A WINNER. JAMES UTTERBACK AND HIS SISTER SOPHIA TAKE REALLY GOOD CARE OF THEIR CALVES AND CARLOS DID WELL FOR JAMES AT THE COUNTY FAIR THIS YEAR.

WITH LARGE GROUPS AND LOTS OF DIVERSITY, JUDGING TEAMS CAN MAKE LOTS OF CLASSES TO PREPARE THEM FOR UPCOMING CONTESTS. THE UNIVERSITY OF MINNESOTA AND WEST TEXAS JUNIOR COLLEGE WERE JUST TWO OF MANY GROUPS WE HOST EACH YEAR

VERIFIED AND GAVEL ENJOYED BEING THE CENTER OF ATTENTION FOR THE CATTLEMEN AND WOMEN ON THE WASHINGTON COUNTY INDIANA BEEF TOUR THIS SPRING.

A LOT OF MISSOURI ANGUS HISTORY RIGHT HERE!

BEN WAS RECOGNIZED THIS PAST WINTER BY THE MISSOURI CATTLEMEN'S ASSOCIATION WITH THE PIONEER AWARD FOR LONG-TIME SERVICE AND COMMITMENT TO THE ASSOCIATION AND INDUSTRY.

WE'RE ALWAYS HAPPY TO WELCOME FFA GROUPS TRAVELING ON THEIR WAY TO NATIONAL CONVENTION.

INTERNATIONAL VISITORS ARE ALWAYS A TREAT AS WE BOTH LEARN FROM EACH OTHER OVER A SHARED LOVE OF AGRICULTURE AND BEEF PRODUCTION. THIS GROUP FROM THE WALES GRAZING SOCIETY WERE CERTAINLY NO EXCEPTION. THE COLD DAMP DAY HAD THEM FEELING RIGHT AT HOME, TOO.

A BIG THANK YOU TO THE GREAT CREW FROM WHEELER AUCTIONS THAT TAKE CARE OF THE SALE CLERKING AND CHECKOUT.

EDDIE WAS INDUCTED IN THE MISSOURI AG HALL OF FAME. THE CEREMONY INCLUDED A RECEPTION AT THE GOVERNOR'S MANSION HOSTED BY FELLOW CATTLEMEN, GOVERNOR AND FIRST LADY MIKE AND CLAUDIA KEHOE.

IT WAS GREAT TO HOST AND VISIT WITH THIS OUTSTANDING GROUP OF STUDENTS FROM THE UNIVERSITY OF WISCONSIN RIVER FALLS BEEF TEAM
